I'm a product designer based in San Francisco, with 16 years of experience in crafting delightful experiences for users. As a product design lead, I have helped teams conceptualize product visions and delivered products to general availability — while vastly influencing the culture, business, and value of design.

Experience

ServiceNow

Principal Product Designer
April 2022 — Present

As a Design Architect, I play a central role in shaping design strategy and process. Through close collaboration with cross-functional partners, I help define and drive product vision — translating user-centered thinking into tangible solutions that deliver measurable business outcomes.

- Design strategist in building and launching the ServiceNow CRM platform — integrating sales and service into a single platform.
- Collectively built a strong team design culture — modeling design best practices to enable the design team to drive impact within their respective product teams.
- Design partner to cross-functional team to deliver 6-12 month and 3 year product strategy. Driving product innovation through the lens of future possibilities and re-imagination of product experiences.
- Contributing design enablement member to the ServiceNow Horizon Design System. Ensuring design consistency across our platform, and enabling design innovation through a scalable design system.

Google

Senior Interaction Designer
September 2020 — April 2022

Design lead for Google Cloud developer experience, with focus on product onboarding and developer tools.

- Successfully launched and landed Cloud Workstations, a cloud-based IDE for remote development with IDEs such as IntelliJ IDEA, PyCharm, Rider, and CLion through JetBrains Gateway, as well as Posit Workbench (with RStudio Pro).
- Measurably increased Google Cloud product adoption with iterative designs to Cloud Interactive Tutorials, a framework for product onboarding.
- Data-informed design approach with experimentation to improve effectiveness in user onboarding.
